Just a heads up for now. A new draft is in and OPPT is looking at it to determine the time needed to respond.

Sven (and Carolyn, since text added to this may end up in the CERCLA bill as well)-

I've attached a new draft. This draft:

- Uses the as-introduced version as base text
- Includes the "all 5(a)(2) except for the 5(e)" SNUR language we talked about (you should fix/edit as needed)
- Includes the 537.1 PFAS as among those that need to be assessed for inclusion on TRI (note my questions about the drafting of that in the comment box)
- Includes a stakeholder-submitted suggestion for alternative drafting of the active chemical inventory language in a comment box

I think this should be a relatively easy/quick review, and I'd appreciate it if you could let me know tomorrow how long this might take to respond to.

Thanks
Michal
